SpiroHealth Laboratories

Evaluation ID: 88880019 | MemberPlan ID: 999000019
Date of Service: 2026-03-30

The patient completed spirometry testing on March 30, 2026. The forced expiratory volume in one second to forced vital capacity ratio was measured at zero point eight three, which falls within the normal range. The FEV1 was eighty-nine percent of the predicted value, and the FVC was ninety-three percent of predicted. The session quality was graded as A, indicating excellent reproducibility of maneuvers. No obstructive or restrictive pattern was identified. Routine follow-up is recommended.
